

National Medicare for All Week of Action

Demand that Congress pass Medicare for All!

The US healthcare system is cruel, broken, and needlessly expensive. Insurance companies rake in billions while far too many people in America go without the health care they need. It's time we have a system that acknowledges healthcare as a human right — and that system is Medicare for All.

Activists from all over the country are coming together in February to launch this campaign to win Medicare for All during a National Week of Action.
