

**Speak-Out Against Another Charter School  
on Radioactive SF Treasure Island  
Stop Poisoning The Students, Teachers & Staff  
Wednesday February 5, 1PM  
San Francisco City Hall Rm 400**

Join United Public Workers For Action UPWA, Defend Public Education NOW! and other community members and trade unionists protesting the decision of London Breed's Treasure Island Development Authority Board to approve a charter at the radioactive contaminated Treasure Island. There has been a decades-long cover-up of the dangers at the Island that continues today. Tetra Tech radiation health and safety inspectors were illegally fired and bullied after reporting the falsification of testing and dangerous radioactive materials on the island. This radioactive material still exists on the island and is a threat to health and safety. This is a super-fund site that has not been cleaned up despite the efforts of agencies like SFUSD, DPH, and TIDA to declare that this site and Hunters Point is safe.

This charter school which they now say they want to open up on a closed public school is a serious danger to the lives of the students, faculty and staff. It had previously been shut down by SFUSD because of serious and deadly health and safety issues for the students, staff, and teachers. The conditions at the public school when it was operating will also be reported on at the press conference.

Despite calls by UPWA and others about these dangers, there continues to be another charter on the Island. Speakers will report on the highly dangerous site and the systemic cover-up of the radioactive dangers including to residents of the island and how this is a threat to any potential students at this charter, the other charter and the lack of protection for the residents and tenants at the island.
