

MEDICARE

AS AMERICAN AS APPLE PIE

PROTECT

IMPROVE

EXPAND

ON THE 50TH ANNIVERSARY OF MEDICARE Nurses Say: We're Taking Our Medicare Back!

As RN caregivers, we're taking a stand to protect Medicare from proposed cuts that will harm our patients. Better yet, we're advocating for a single standard of safe, therapeutic care for all: improved and expanded Medicare for All!

- All of our patients would have access to a single standard of quality care
- Better care, lower cost — healthcare dollars no longer go to insurance company CEO salaries, marketing and advertising budgets, and multibillion dollar Insurance company profits
- RN and physician clinical judgment not overridden by health insurers
- An end to high deductibles and co-pays that discourage our patients from seeking care they need — until it often becomes too late
- Hospitals tailor care more to patient need, rather than “boutique” services that garner high insurance reimbursements
- Hospital closures become a thing of the past. Patients don't lose access to their community hospital, and nurses can continue to give the care our patients need
- An end to bogus patient satisfaction score measurements (based on hospitality industry standards) determining reimbursement levels. Emphasis on actual patient outcome and quality of care.
